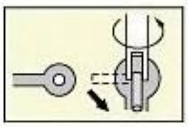
Description

Name:	6 Sets to help welding tools	Model:	BST-SA-10
Brands:	BEST	Material:	With no magnetic
Size:	185mm	Weight:	85g

Feature1:	For machine repair, assembling, dismantle components, grinding, cleaning, and designed the tin
Feature2:	Will of pressure, drilling, welding repair when pry, poke, cut, blow, hook, pull, roof,Brush... 12 kinds of demand centres in the six auxiliary too
Feature3:	Used to install and repair circuit board, which are widely used in the welding of printed circuit board (PCB) assembly and repair work

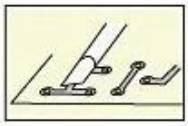
Size

BST-SA-10：Fork

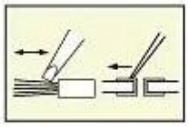


Fixed or adjust the components of the pins and connectors

BST-SA-10: Knife

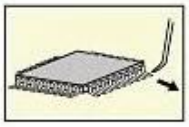


and

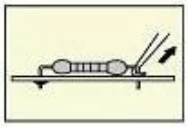


You can cut the copper connection on the printed circuit board

BST-SA-10：Hook and Fork



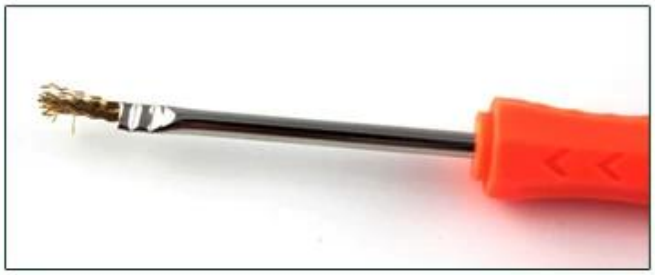
and

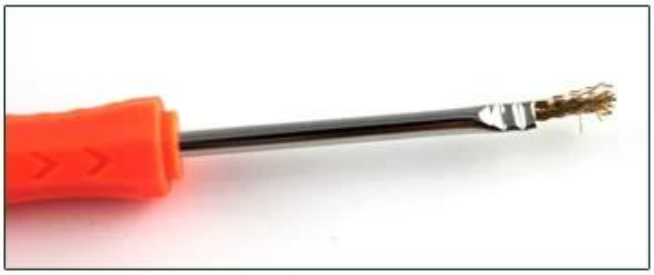


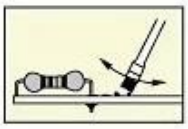
You can hook up components of the pins and wires.

Fixed or adjust the components of the pins and connectors

BST-SA-10：Brush

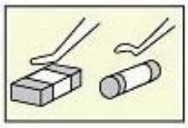






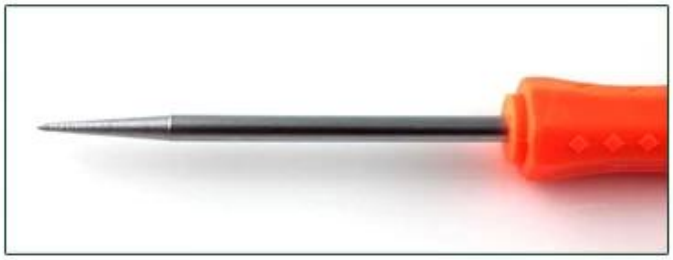
Before soldering, you can Clean dust and residue on the components

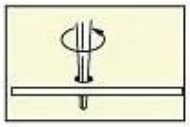
BST-SA-10：Chip Hold



Small electronic components compaction, positioning after soldering circular element, element correspondi -ng to the pressure head at ordinary times

BST-SA-10：Awl





Clean or expanded pad holes
