

Features

Item :BEST-509 80g solder paste

BEST-solder (Tin) paste is the best choice of reballing IC .original ,Quality Verified

Use Range:laptop /computer/mobile phone/home Appliances SMD and BGA IC repairing tools for chip-level repairing

Specification

White and plump solder joint, No False welding, Strong adhesive with solder iron tip .it's Indispensable tool for Accurate equipment repairing and Electronics Manufacture line.

PRODUCT DISPLAY

PRODUCT DETAILS

Name: Tin Paste

Model: BST-509

Size: $\phi 36 \times 35$ mm

Weight: 80g

Composition: Sn63/Pb37

Melting point: 183°C

Storage: Chilled in refrigerator, the best refrigeration temperature is 5°C~10°C.

Features: 1. New technical support, unique chemical formula provides excellent wettability, ensuring high reliability.

2. Use highly effective thixotropic agents to effectively prevent the collapse of printing and preheating, and ensure good printing and fine pattern.

3. More advanced thermal insulation technology, adhesive durability, not easy to dry, sticky time up to 48 hours.

4. High quality, unique formulation, perfect performance, easy to weld, bright and full of welding spot, no such phenomenon as false welding or false welding.

5. The residue is colorless and transparent. It does not affect the monitoring, cleaning and cleaning performance.

6. Good moisturizing and dry resistance. Under normal temperature, the shelf life is longer, which is suitable for mobile phone maintenance, computer digital maintenance industry, high precision circuit board SMT welding, BGA process welding, etc.
