8 LED lamps(long service life)

This microscope is equipped with a universal gimbal that is very light and powerful and can be attached to any surface, including glass, ceramic, marble, wood, plastic and other

The magic silicone suction cup will not leave any trace on the surface of any material. When the silicone suction cup is used for a long time, the viscosity will be weak. Don't worry, you can restore the viscosity by washing with water.

Built-in large capacity lithium battery

It takes about 4 hours to fully charge and more than six hours to work continuously.
