

Eigenschaften:

Artikel: BEST-509 80g Lötpaste

BEST-Lötpaste (Zinn) ist die beste Wahl reballing IC .original ,Qualität bestätigt

Verwenden Sie Reichweite: Laptop / Computer / Handy / Haushaltsgeräte SMD und BGA IC Reparatur. Werkzeuge für die Reparatur auf Chip-Ebene

Spezifikation

Weißer und matten Lötstelle, keine falschen Schweißen, starke Kleber mit LötKolbenspitze. Es ist unverzichtbares Werkzeug für genaue Reparatur von Geräten und Electronics Manufacture Linie.

PRODUCT DISPLAY

PRODUCT DETAILS

Name: Tin Paste

Model: BST-509

Size: $\phi 36 \times 35$ mm

Weight: 80g

Composition: Sn63/Pb37

Melting point: 183°C

Storage: Chilled in refrigerator, the best refrigeration temperature is 5°C~10°C.

Features: 1. New technical support, unique chemical formula provides excellent wettability, ensuring high reliability.

2. Use highly effective thixotropic agents to effectively prevent the collapse of printing and preheating, and ensure good printing and fine pattern.

3. More advanced thermal insulation technology, adhesive durability, not easy to dry, sticky time up to 48 hours.

4. High quality, unique formulation, perfect performance, easy to weld, bright and full of welding spot, no such phenomenon as false welding or false welding.

5. The residue is colorless and transparent. It does not affect the monitoring, cleaning and cleaning performance.

6. Good moisturizing and dry resistance. Under normal temperature, the shelf life is longer, which is suitable for mobile phone maintenance, computer digital maintenance industry, high precision circuit board SMT welding, BGA process welding, etc.
