

Product Description

This is an excellent Cordless Soldering Iron. It is ideal for delicate

Melting, softening; reshaping jobs that a standard blow torch would not be sufficiently or precise enough.

It is extremely easy to refill as its special design, refill gas on the top of this product and tweak this button to OFF when refilling.

Will hold just enough gas in its chamber to make sure you get the job done safely and fully finished. Soldering Iron Tool with blue pen shape.
