PRODUCT DISPLAY

PRODUCT SIZE

name: Glass alcohol bottle	Weight: 260g
size: Φ80mmx108mm	Features: Press out water to prevent corrosion
capacity: 150ml	
Material: Cap (PP polypropylene), bottle (glass), liquid pump (aluminum alloy)	

1. It adopts corrosion-resistant liquid pump and anti-acid anti-decrease glass material, which has superior corrosion resistance.
2. Good light transmission, it is easy to see the condition of the liquid inside.
3. Easy to take liquid, save time and improve work efficiency.
4. Closed door valve can prevent the sucked liquid from flowing back into the bottle and prevent the liquid in the bottle from volatilizing.

Used for washing water, flux, alcohol, etc.
Storage of volatile liquids

Anti-static metal suction pump

Smoother fluids and save time.
Improve work efficiency

Pump port design

Stainless steel pump port for precision valve design
Press-type bottle, water can be effectively pressed with one touch
Prevent solvent leakage, volatilization and corrosion.

Glass alcohol bottle

Using anti-acid, anti-depreciation,
anti-corrosion glass materials,
Has a strong corrosion resistance.
