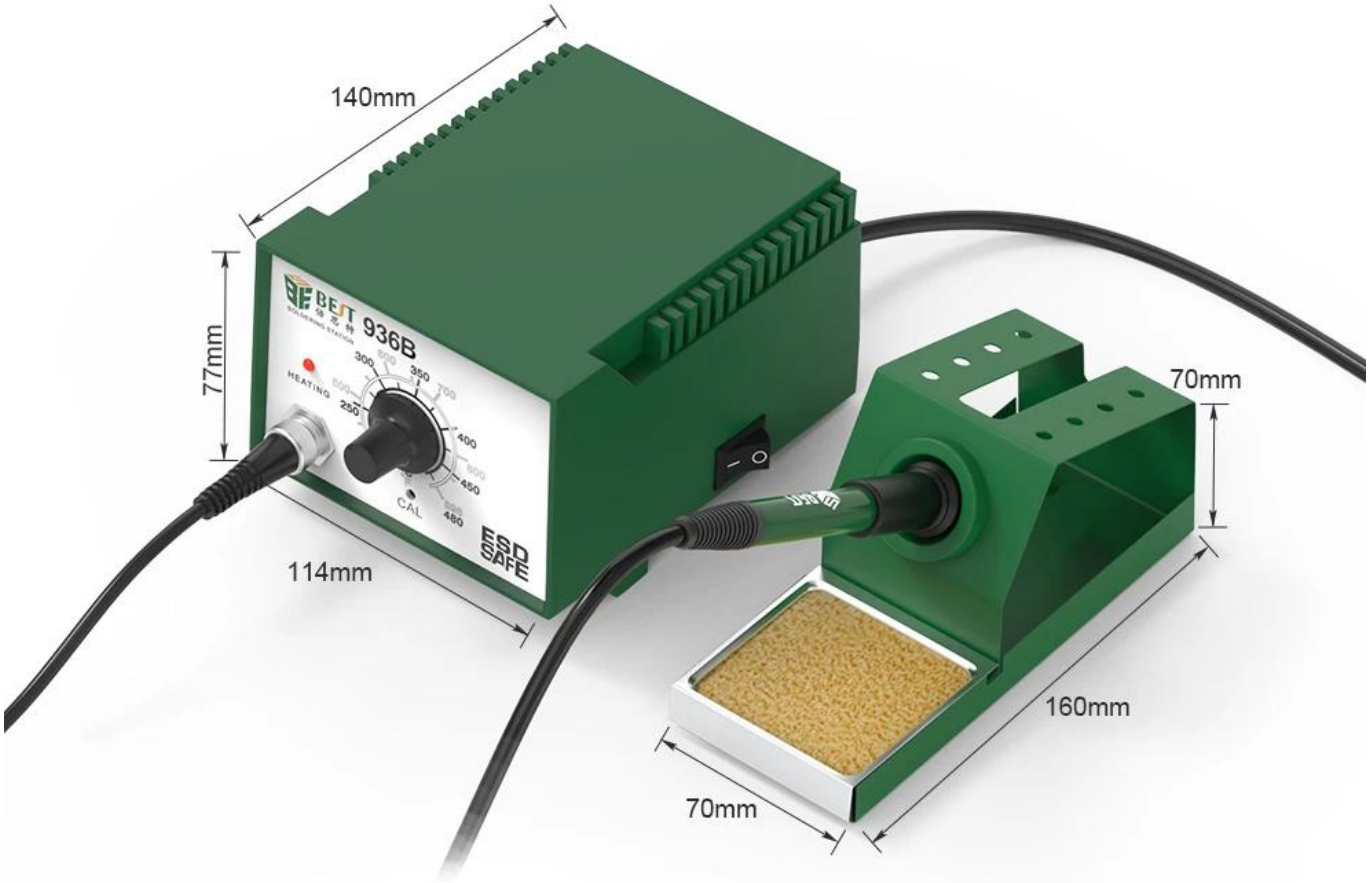
BST-936B

LEAD-FREE ANTISTATIC
SOLDERING STATION
BEST 936B
SOLDERING STATION
HEATING
CAL
ESD SAFE
Lead-free
Exact temperature
Heat up quickly
Use safety

Product Usage



model	**936B**
Dimensions	114 * 140 * 77mm
Power consumption	60W
Body weight	1.95KG
High temperature resistant wire	Have
Input power voltage	220VAC ± 10% 50 / 60HZ
Temperature control range	200-480 ° C / 392 ° F-896 ° F
The output voltage	24VAC
Setting method	Knob adjustment
Welding tip to ground impedance	<2Ω
Welding nozzle to ground voltage	< 5mV
Temperature stability of soldering iron	± 1 ° C
Heater	Imported ceramic heating element
Soldering iron	M-T-I mouth

▼CHARACTERISTICS

The soldering station has an anti-static design, which effectively protects SMD components and is powered by a low-voltage power supply. It can effectively protect the safety of sensitive devices and workers, smooth soldering and stable temperature.

PRODUCT INFORMATION

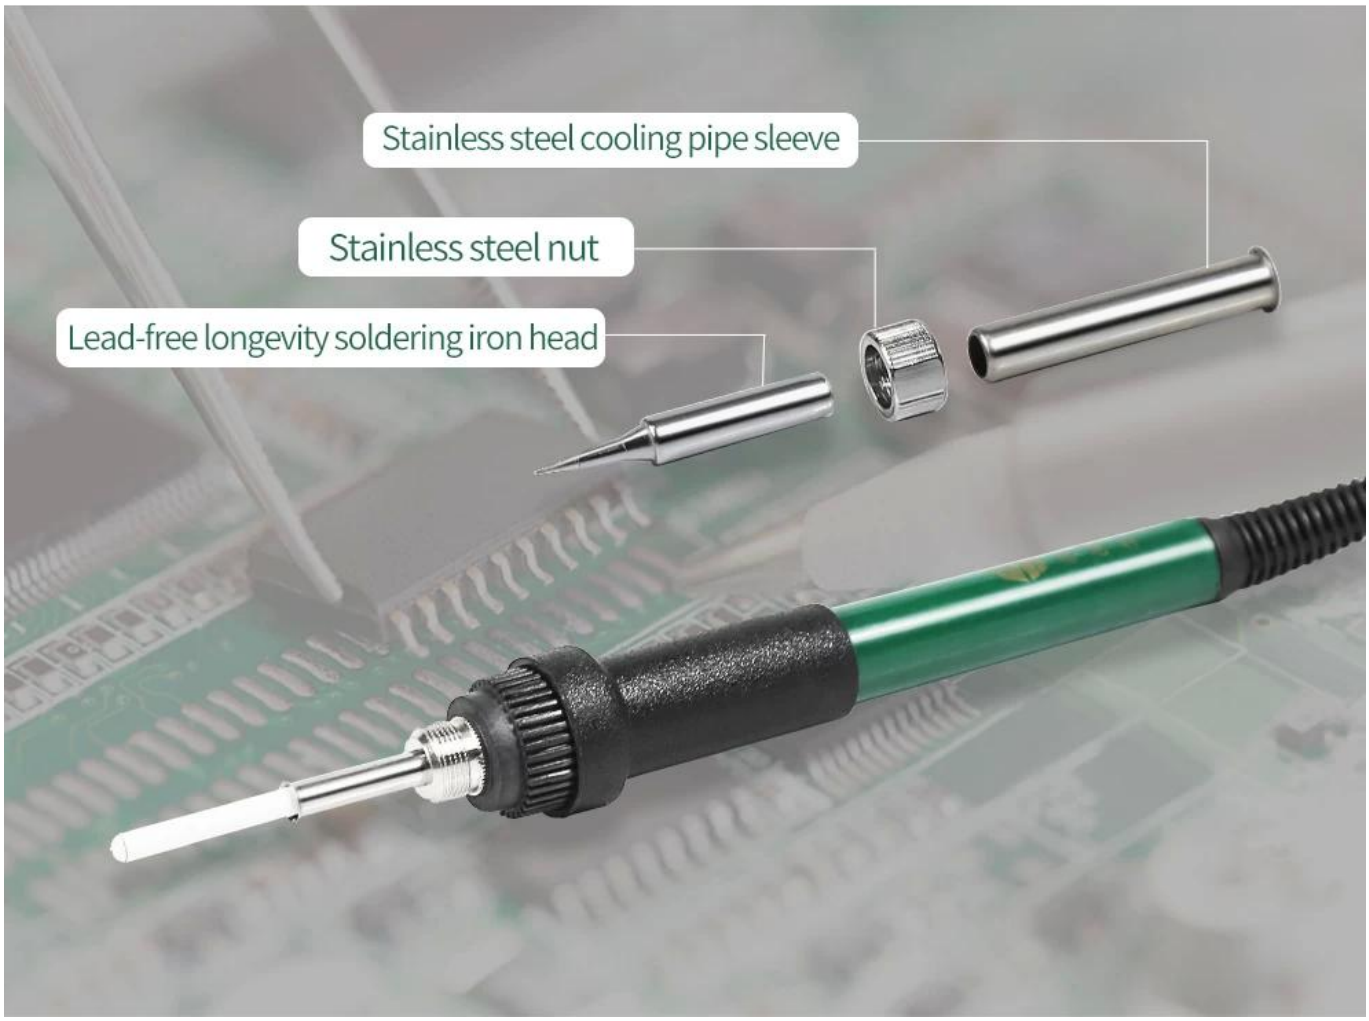
High temperature resistant PVC shell

Non-slip thermal insulation silicone protective sleeve

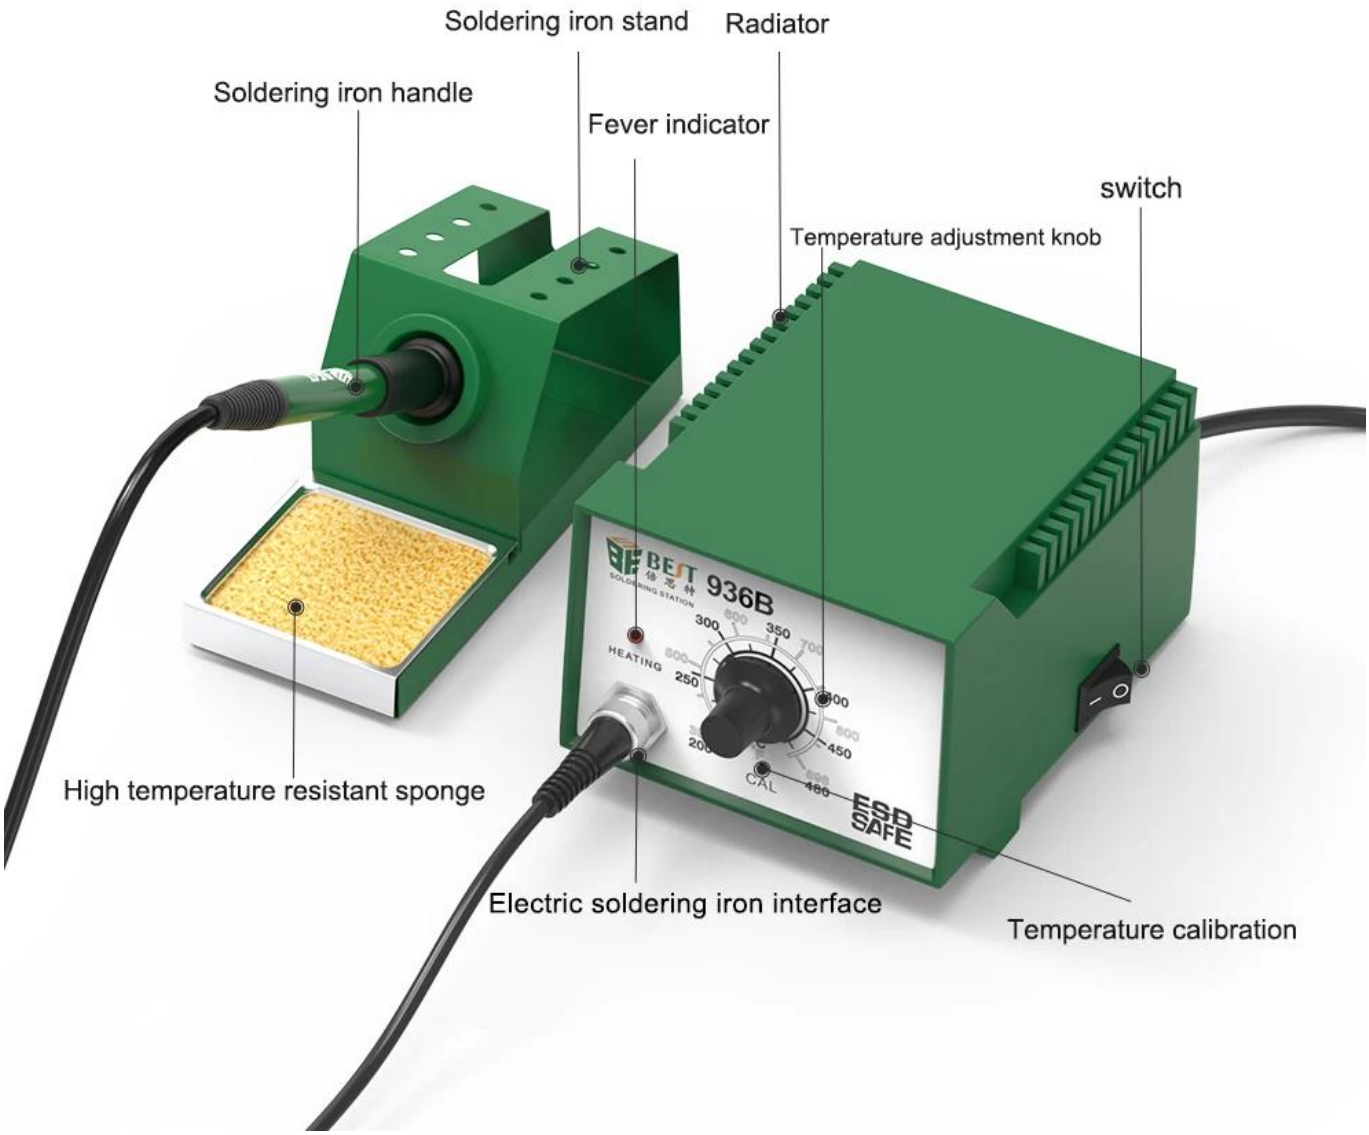
PRODUCT INFORMATION

High temperature resistant PVC shell

Non-slip thermal insulation silicone protective sleeve



Stainless steel cooling pipe sleeve
Stainless steel nut
Lead-free longevity soldering iron head



Soldering iron stand
Radiator
Soldering iron handle
Fever indicator
switch
Temperature adjustment knob

COMPARISON MAP

BESTOOL	OTHER SUPPLIERS
Patch soldering solder joints are sturdy	Jack welding solder joints are easy to loose machine failure frequency is hig
	Large transformer power is bigger fast speed	Small transformer low power slow output
Imported ceramic heating core high temperature resistance and long life	Inferior heating core short life
