

DEDICATED FOR SEPARATOR

SEPARATION MACHINE NON-SLIP SILICONE PAD

STRONG ADSORPTION | SOFT SILICONE | NON-SLIP AND STABLE

STRONG ADSORPTION

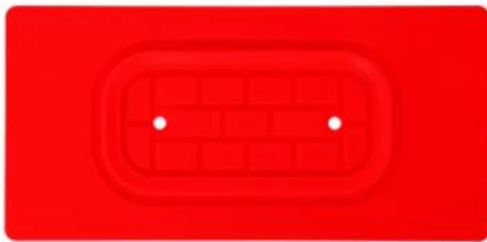

SOFT SILICONE

NON-SLIP AND STABLE

PRODUCT PARAMETERS

SEPARATION MACHINE
SILICONE PAD

PRODUCT NAME	separation machine Non-slip silicone pad
PRODUCT MODEL	BST-S-2000
PRODUCT NET WEIGHT	38.5g
PRODUCT SPECIFICATION	1/张
PRODUCT SIZE	162mm×79mm

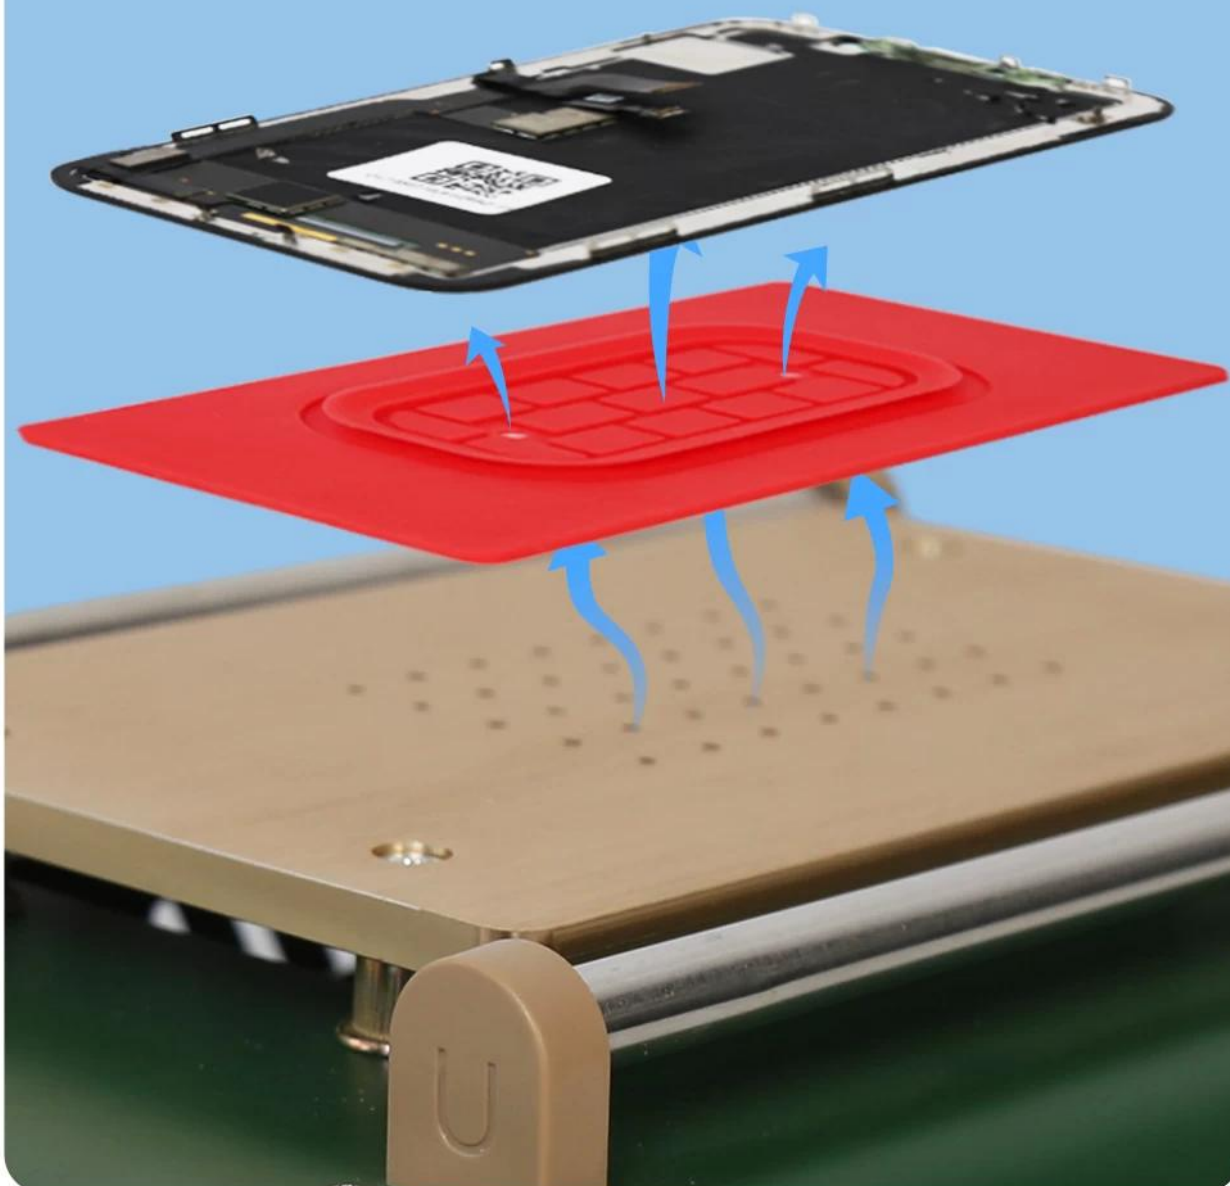

▼ PRODUCT ADVANTAGES

Suitable for a variety of separation machine, strong adsorption, high temperature resistance. The material is environmentally friendly and soft, with good toughness and not easy to deform. It has a double-hole design and a square backflow groove to prevent air leakage and increase the downforce adsorption force.

BIONIC SUCTION CUP DESIGN

SEPARATION MACHINE
SILICONE PAD

Adopt octopus sucker design to absorb
effectively improve the adsorption force by 40%
High adsorption force, helping you work efficiently

SOFT SILICONE NO DEFORMATION

SEPARATION MACHINE
SILICONE PAD

Products are made of high-quality environmentally friendly raw materials
No peculiar smell, good flexibility, no deformation when stretched and curled

DOUBLE HOLE DESIGN HIGH ADSORPTION

SEPARATION MACHINE
SILICONE PAD

Double hole design, square backflow groove
Prevent air leakage and increase downforce adsorption
