

Solder paste soldering BGA flux for welding welding tool welding repair rework

product description

100% new high quality!

Roof flux is used to promote welding.

It can be cleaned and prevented from oxidizing metal, thereby producing a strong, persistent mechanical and electrical connection.

It can also be used as a wetting agent, increasing the efficiency of solder flow and welding process. Suitable for mobile phones, PC cards and other precision electronic chip-level flux welding.

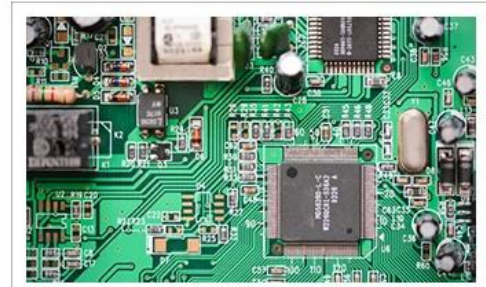

PRODUCT DISPLAY

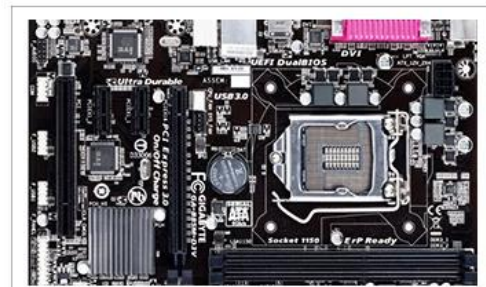

UV curing solder mask ink

Dedicated to the repair of computer, mobile phone
PCB circuit board and wire solder mask peeling or local love damage,
and fly wire fixed insulation, is the computer, mobile phone repair
essential materials

PRODUCT DETAILS

Suitable for green motherboard

Suitable for black motherboard

Suitable for yellow motherboard

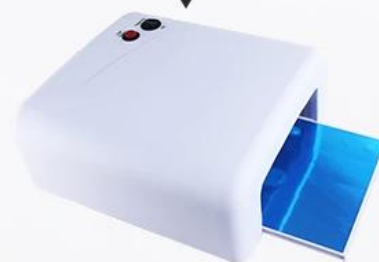

Suitable for red motherboard

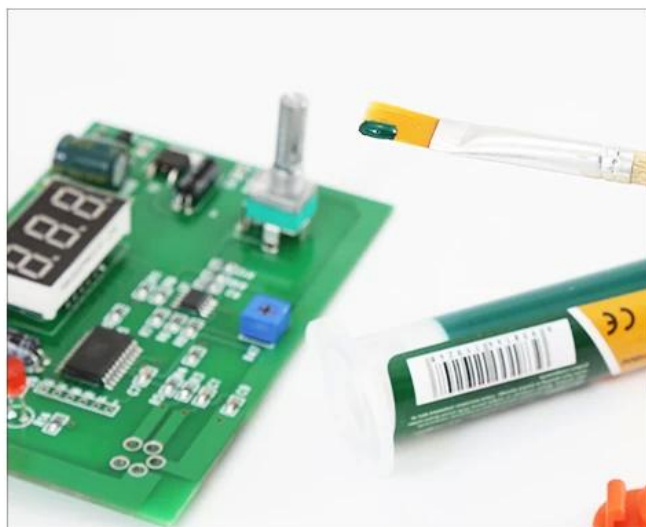

Suitable for blue motherboard

Auxiliary tools: UV curing light

Squeeze a little green oil to the repaired place, pay attention to only a small amount, Brush the green oil evenly with a brush, then irradiate it with UV light for a few minutes. If it is naturally dry, it will not dry for many days. Green oil is insulating and sticky.
