

# High-speed grinding pen

Smaller size and can be  
operated with one hand

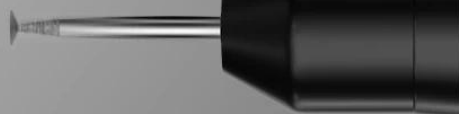

86g  
weight

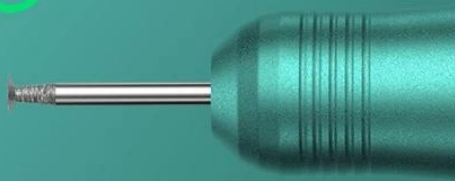

Aluminum alloy body with  
high concentricity grinding

BEST

⋮

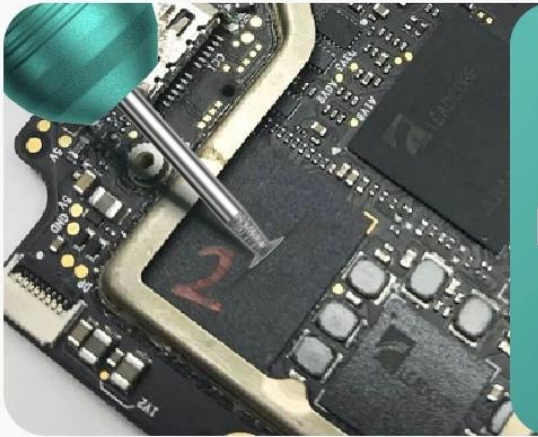

Inferior Grinding Pen

BEST Grinding Pen

# Wider scope of application proficient in grinding and engraving

Motherboard grinding

Jade carving

Nail removal

Built-in high-speed  
brushless motor

Speed 15000rpm

Simple  
operation

one-click

Noise reduction  
processing

25 decibels for  
silent operation

Plug in for  
long-term use

Small and handy

# Noise Reduction and Mute Processing

The working noise is less than 30decibel

Quiet and not harsh

00000000000000000000 25decibel

00000000000000000000 30-35decibel

00000000000000000000 40-45decibel

# High-speed brushless motor with a maximum speed of 15,000 rpm

# 15000

The motor is the rendering drawing, and the specific object shall prevail

Strong power

High-speed rotation

Pure copper winding

# Piano touch key switch Various functions can be switched with one key

1 Indicator light

2 Three-speed adjustment

3 Positive and negative rotation

4 Power switch

# Dual power hybrid drive

## Battery/plug switch

Built-in large-capacity  
1200mah lithium battery

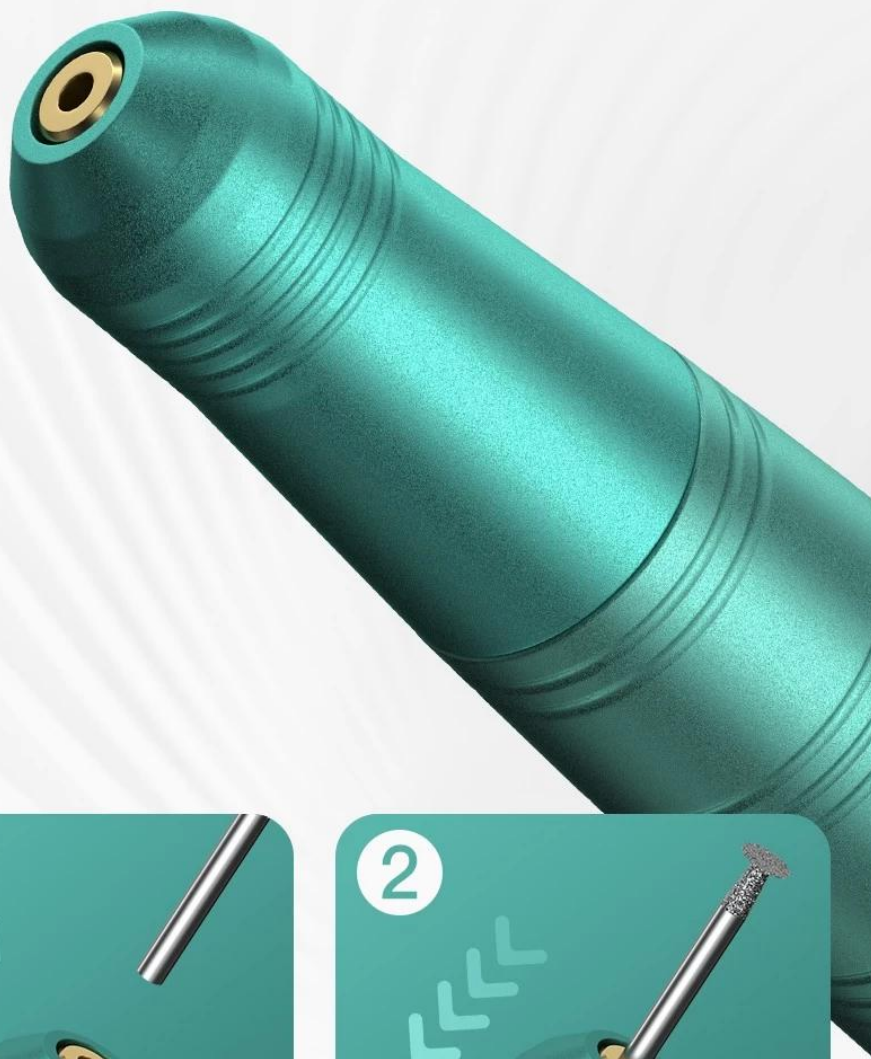

Faster charging and  
wider application range

More stable charging  
with MICRO interface

Thick-walled copper chuck for quick replacement of the grinding head

# Product parameter

**name :** Pen sander

**torque :** 110g

**capacity:** 1200mah

**material:** Aluminium alloy

**weight :** 86g

**speed :** 15000rpm

**size :** 148\*26.5mm

**Head size:** 2.25-2.35mm
