

BST-863 digital hot air rework station

feature:

- 1 This hot air rework station uses a heating device to heat the air that can be used for welding.
- 2 has 3 memory channels: CH1, CH2 and CH3, which can be easily switched as needed after setting the temperature, airflow and time.
- 3 Equipped with a magnetic sensor, the machine can work quickly as long as you hold the handle. When the handle is placed into the frame, the machine will cool down to 100°C and enter standby mode.
4. It has automatic sleep function and can be set in sleep state.
- 5-sensor closed-loop, zero-crossing trigger microcomputer temperature control, LCD touchscreen. Rapid preheating and precise and stable temperature control make it truly lead-free soldering.
6. It adopts a variable frequency blower, which is adjustable and has a wide range of air flow, which can be used for a variety of purposes.
- 7 Automatic air cooling function makes the machine more durable and long-lasting.

PRODUCT SIZE

Digital hot air desoldering station

- ✓ High power
- ✓ Automatic sleep
- ✓ Brushless turbine
- ✓ Warming up quickly
- ✓ Accurate and stable

PRODUCT FEATURES

Touch sensitive keys

Sensors closed loop, Zero-crossing triggering microcomputer temperature control, LCD touch screen. Heating up rapidly, the temperature accuracy and stability, without effect of the air flow, and truly achieved lead-free solder.

Back

Bottom

Model :	BST-863	Power :	1200W
Weight :	3.65kg	Display type :	LCD
Input Voltage :	AC 220V/110V 50/60Hz	Noise :	<45dB
Temperature Range :	100°C~550°C 212°F~1022°F		
Temperature Accuracy :	±1°C (Static)		
Air Volume Range :	1~100 level		
Mainframe Size :	188(L)*240(D)*135(H)mm		
Working Environment :	0°C~40°C/32°F~104°F		
Storage Environment :	-20°C~80°C/-4°F~176°F		
Storage Humidity :	35%~45%
