# REAL-TIME MONITORING OF CURRENT/VOLTAGE

Accurately monitor the real-time ouput voltage and current values of the activation board, measure power supply equipment empty/load voltage

Supports iP 14/15 series

## **Battery Clip Test Active Panel**

One-key battery activation/Charging intelligent identification/ Overload protection/Automatic power off

BST-J2

## Six core strengths

4.2V regulated output

Detect current and voltage

Automatic power-off protection

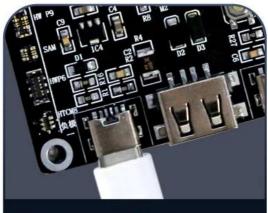

Compatible with Apple/Android fast charging

Automatic identification of positive and negative poles

One-key activation for power loss

Power supply by Type-C or alligator clip

#### Charging/output multi-interface

With Type-C/USB/Alligator clip three interfaces
Both Type-C and USB interfaces can be input/output,
with stable voltage and fast charging

#### 4.2V voltage regulator output

Overload and short circuit protection, regulated output intelligent identification of positive and negative battery

#### Two charge management chips

Using two charge management chips, constant temperature and constant current, automatic power-off when fully charged

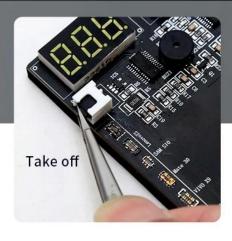

#### **External current pointer interface**

Remove the dust cover on the DCT3 interface to connect the pointer meter

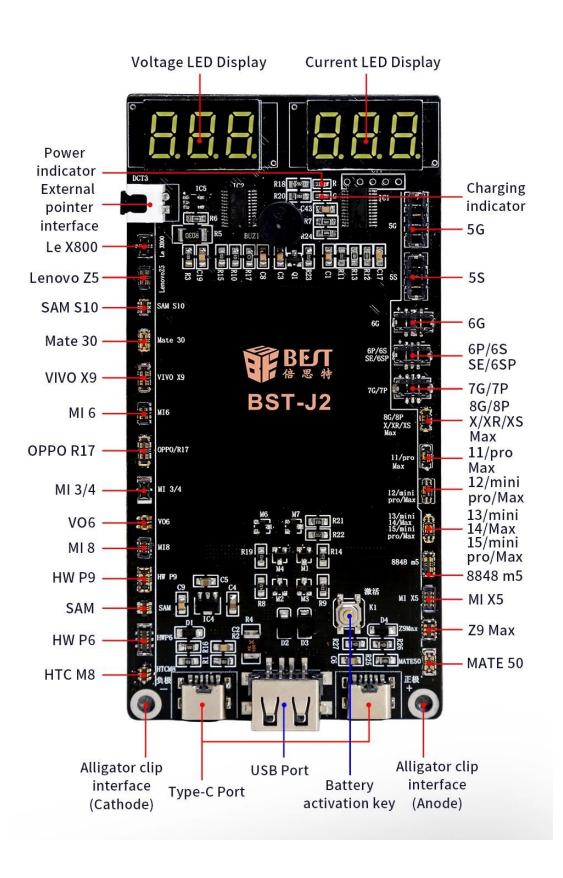

#### Added Support for iP15/Mate 50 Applicable to iP5-15 Series

Integrated 27 battery holders, compatible with most of Android and Apple batteries, 9 for Apple and 18 for Android

#### **Parameters**

. . .

Name	Battery Activation Detection Board	Working Voltage	4.2V~5.0V		
Model	BST-J2	Screen Type	LED digital display		
Product Size	63*125*10mm	Package Size	100*155*28mm		
N. W.	About 40g	G. W.	About 65g		
Supported models	5G/5S/6/6S/6SP/7/7P/8/8P/X/XR/XS/XS Max/11/11P/11PM/12/ 12mini/12P/12PM/13/13mini/13P/13PM/14/14P/14PM/14 Plus 15/15mini/pro/Max/5Se/Se1/Se2/ 99% of Android phone models
