Description

Name:	6 Sets to help welding tools	Model:	BST-SA-10
Brands:	BEST	Material:	With no magnetic
Size:	185mm	Weight:	85g
Feature1:	For machine repair, assembling, dismantle components, grinding, cleaning, and designed the tin		
Feature2:	Will of pressure, drilling, welding repair when pry, poke, cut, blow, hook, pull, roof,Brush... 12 kinds of demand centres in the six auxiliary too		
Feature3:	Used to install and repair circuit board, which are widely used in the welding of printed circuit board (PCB) assembly and repair work		

Size

BST-SA-10: Fork

Fixed or adjust the components of the pins and connectors

BST-SA-10: Knife

and

You can cut the copper connection on the printed circuit board

BST-SA-10: Hook and Fork

and

You can hook up components of the pins and wires.

Fixed or adjust the components of the pins and connectors

BST-SA-10: Brush

Before soldering, you can Clean dust and residue on the components

BST-SA-10: Chip Hold

Small electronic components compaction, positioning after soldering circular element, element corresponding to the pressure head at ordinary times

BST-SA-10: Awl

Clean or expanded pad holes
