

Características:

Artigo: BEST-509 80g pasta de solda

BEST-solda (Tin) pasta é a melhor escolha de reballing IC .original ,Qualidade verificada

Intervalo de uso: laptop / computador / telefone celular / eletrodomésticos SMD e BGA IC
reparação, ferramentas para reparação de nível de chip

Especificação

Articulação de solda branca e gorda, Não soldagem falsa, adesivo forte com ponta de ferro de solda. Ferramenta indispensável para a reparação de equipamentos precisos e a linha de fabricação de eletrônicos.

PRODUCT DISPLAY

PRODUCT DETAILS

Name: Tin Paste

Model: BST-509

Size: $\phi 36 \times 35$ mm

Weight: 80g

Composition: Sn63/Pb37

Melting point: 183°C

Storage: Chilled in refrigerator, the best refrigeration temperature is 5°C~10°C.

Features: 1. New technical support, unique chemical formula provides excellent wettability, ensuring high reliability.

2. Use highly effective thixotropic agents to effectively prevent the collapse of printing and preheating, and ensure good printing and fine pattern.

3. More advanced thermal insulation technology, adhesive durability, not easy to dry, sticky time up to 48 hours.

4. High quality, unique formulation, perfect performance, easy to weld, bright and full of welding spot, no such phenomenon as false welding or false welding.

5. The residue is colorless and transparent. It does not affect the monitoring, cleaning and cleaning performance.

6. Good moisturizing and dry resistance. Under normal temperature, the shelf life is longer, which is suitable for mobile phone maintenance, computer digital maintenance industry, high precision circuit board SMT welding, BGA process welding, etc.
