

# Intelligent thermostat electric iron

Anti-static  
Rapid warming  
Ceramic heater

## PRODUCT DETAILS

Brand:		Model:	102C
Power:	90W-60	Length:	130cm
Weight:	192g	Heater:	Ceramic heater
Input voltage:	AC110V-220V	Temperature range:	280-480 ° C
Package dimensions:	295*61*50mm	Tip to ground impedance:	2Ω
Tip to ground voltage:	<0.5V	Temperature position:	5
Uses:	home, maintenance, students, production lines, laboratories		
Features:	<ol style="list-style-type: none"> <li>1. Using imported ceramic heating core, heating up quickly</li> <li>2. Imported safety silicone power cord, soft and high temperature resistant, anti-scalding and wear-resistant.</li> <li>3. High temperature resistant silicone protective cover, non-slip heat insulation, anti-static</li> <li>4. The handle is made of environmentally friendly nylon plastic, which is resistant to high temperature and deformation.</li> <li>5. There is memory function, it will automatically remember the last used temperature after booting.</li> <li>6. Intelligent temperature compensation, according to the size of the solder joints, will intelligently and quickly fill the temperature</li> <li>7. Small size, low power consumption of the control system</li> </ol>		

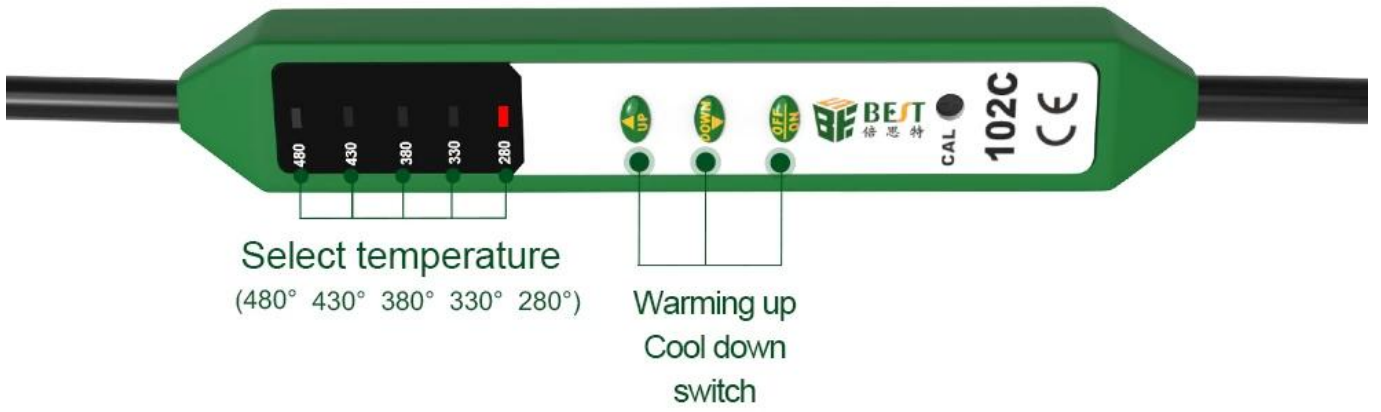

PRODUCT FEATURES

European regulations  
220V-50Hz

U.S. regulations  
110V-60Hz

British regulatory  
230V-50Hz

◀ Front

Back ▶

# High quality soldering iron

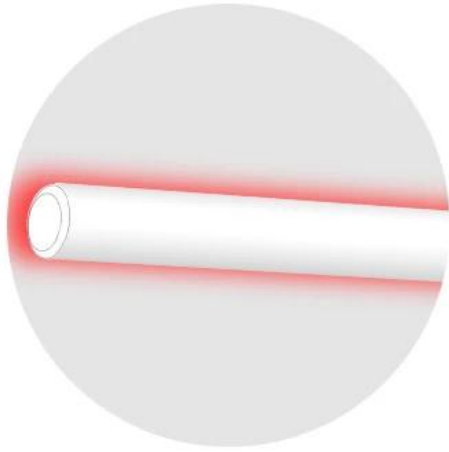

Anti-oxidation, Long life, Anti-rust, Shangxi fast, Effectively prevent climbing tin

# Imported ceramic heater

Fast heating, long life

The handle is made of environmentally friendly nylon plastic, which is resistant to high temperature and deformation.

Imported safety silicone power cord

## Silicone protective cover

High temperature resistance

Non-slip insulation

anti-static

**Small size, easy to use, easy to carry**
