

NEW UPGRADE 210

PRECISION SUPER SOLDERING STATION

Super Solder 210

Unique dual power supply system

210 Precision Super Soldering Station

Rich functions, super long life

2.5 seconds to heat up

Dual power supply

Safety voltage

Anti-static design

Independent English menu

Multi-function temperature mode selection

**Automatic hibernation One key to
restore factory settings**

Powerful temperature control system

Automatically adjust the output power according to the size of solder joints and components

Product parameter

Name: Super Soldering Station 210

Applicable functions: Electronic appliances repair to electronic integrated circuits and chips will be applied to the soldering station as Soldering tools, but most commonly used for soldering PCB circuit boards in electronics factories

Characteristic: Rapid heating in 2.5 seconds Integrated soldering iron temperature memory function

Model: BST-210

Weight: 2.15KG

Size: 150mm*135mm*130mm

Super cooling and mute system
Double grounding for
long-lasting and safe work
