

## Description

|                  |   |                       |          |
|------------------|---|-----------------------|----------|
| <b>Name:</b>     | Welding head  | <b>Model:</b>         | 900M-T-I |
| <b>Brands:</b>   | BEST  | <b>Specification:</b> | I        |
| <b>Size:</b>     | 41mm  | <b>Weight:</b>        | 73.5g    |
| <b>Material:</b> | Copper, iron, nickel and chromium   |                       |          |
| <b>Feature1:</b> | Oxygen-free copper material imported raw materials, thermal fast                            |                       |          |
| <b>Feature2:</b> | Up and down the tin and smooth, stable performance after welding joints smooth, uniform     |                       |          |
| <b>Feature3:</b> | Take the tin and smooth, life over 70,000 solder joints                                     |                       |          |
| <b>Feature4:</b> | Overall use of special machinery and production process, the precise size                   |                       |          |
| <b>Feature5:</b> | Electroplating using advanced nanotechnology, with superior corrosion, oxidation resistance |                       |          |
