100% 60% 40% 0.3-1.0 solderability

Description

Name:	Soldering wire	Brand:	BEST
Ingredient:	60% Tin, 40% lead	Weight:	500g
Melting:	183-190 (°C)	Temperature:	280-320 (°C)
Specification:	Φ0.5mm、0.6mm、0.8mm、1.0mm		
Features1:	Good wetting, good solderability.		
Features2:	Fewer impurities, the proliferation of good adhesion		
Features3:	Less smoke, less spatter, environmentally friendly products		
Features4:	Increase production speed.Reduce production costs		
Features5:	To welding-intensive printed circuit board.		

Size
