

Intelligent thermostat electric iron

Anti-static
Rapid warming
Ceramic heater

PRODUCT DETAILS

Brand:		Model:	102C
Power:	90W-60	Length:	130cm
Weight:	192g	Heater:	Ceramic heater
Input voltage:	AC110V-220V	Temperature range:	280-480 ° C
Package dimensions:	295*61*50mm	Tip to ground impedance:	2Ω
Tip to ground voltage:	<0.5V	Temperature position:	5
Uses:	home, maintenance, students, production lines, laboratories		
Features:			
1. Using imported ceramic heating core, heating up quickly			
2. Imported safety silicone power cord, soft and high temperature resistant, anti-scalding and wear-resistant.			
3. High temperature resistant silicone protective cover, non-slip heat insulation, anti-static			
4. The handle is made of environmentally friendly nylon plastic, which is resistant to high temperature and deformation.			
5. There is memory function, it will automatically remember the last used temperature after booting.			
6. Intelligent temperature compensation, according to the size of the solder joints, will intelligently and quickly fill the temperature			
7. Small size, low power consumption of the control system			

PRODUCT FEATURES

◀ Front

Back ▶

High quality soldering iron

Anti-oxidation, Long life, Anti-rust, Shangxi fast, Effectively prevent climbing tin

Imported ceramic heater

Fast heating, long life

The handle is made of environmentally friendly nylon plastic, which is resistant to high temperature and deformation.

Imported safety silicone power cord

Silicone protective cover

High temperature resistance
Non-slip insulation
anti-static

Small size, easy to use, easy to carry
